

Creating a Dial-Up Connection to IOT Dial-Up

Right click My Network Places on your Desktop and choose Properties.

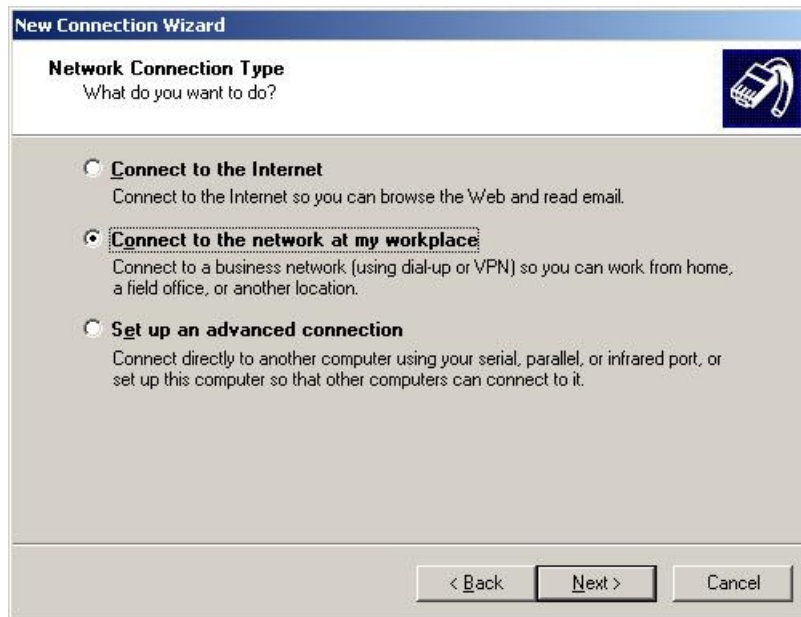

Double click New Connection Wizard.

Click Next.

Click Connect to the network at my workplace. Click Next

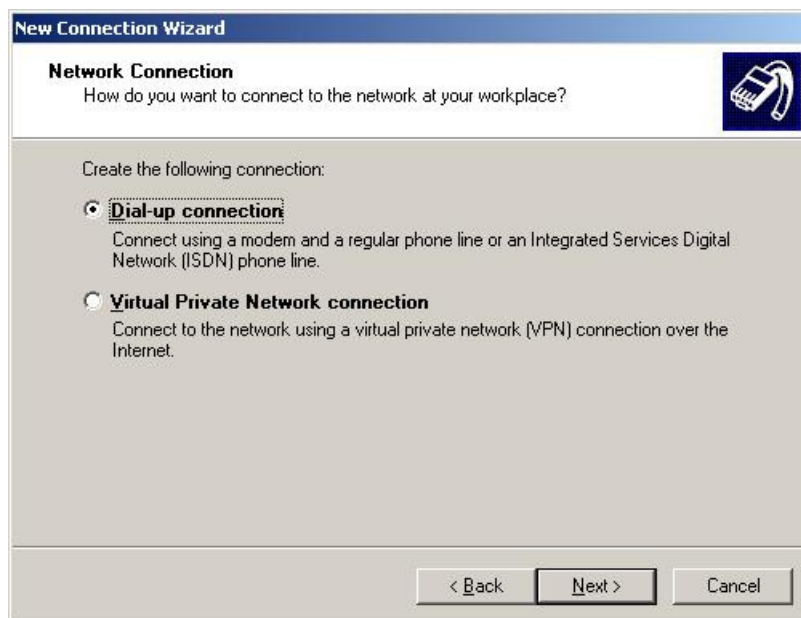

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The subtitle is "Network Connection Type" with the question "What do you want to do?". On the right, there is a small icon of a computer with a network cable. The main area contains three radio button options:

- ☐ **Connect to the Internet**
Connect to the Internet so you can browse the Web and read email.
- ☒ **Connect to the network at my workplace**
Connect to a business network (using dial-up or VPN) so you can work from home, a field office, or another location.
- ☐ **Set up an advanced connection**
Connect directly to another computer using your serial, parallel, or infrared port, or set up this computer so that other computers can connect to it.

At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".

Click Dial-up connection. Click Next

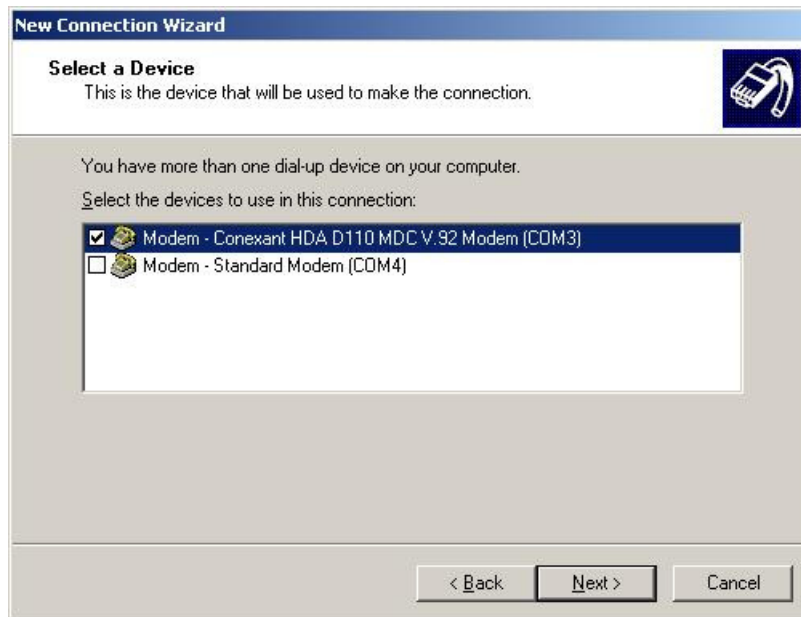

The image shows a second "New Connection Wizard" dialog box. The subtitle is "Network Connection" with the question "How do you want to connect to the network at your workplace?". On the right, there is a small icon of a computer with a network cable. The main area contains the text "Create the following connection:" followed by two radio button options:

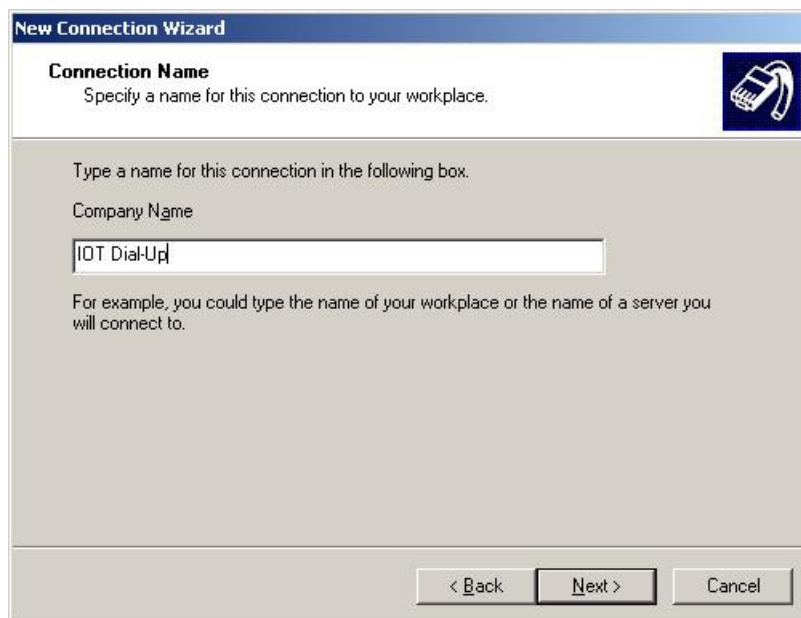

- ☒ **Dial-up connection**
Connect using a modem and a regular phone line or an Integrated Services Digital Network (ISDN) phone line.
- ☐ **Virtual Private Network connection**
Connect to the network using a virtual private network (VPN) connection over the Internet.

At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".

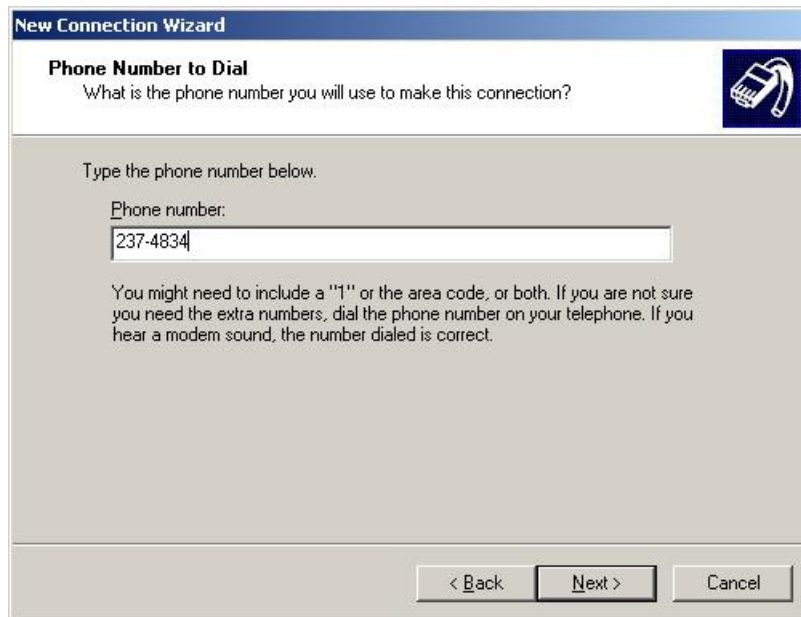

If prompted, choose your modem. Click Next.

Type a name for this connection. You can make it anything you, but be sure to be descriptive.

Type the phone number in the box. Click Next.

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The subtitle is "Phone Number to Dial". Below the subtitle is the question "What is the phone number you will use to make this connection?". To the right of the text is a small icon of a telephone handset. Below this, it says "Type the phone number below." followed by a label "Phone number:" and a text input field containing "237-4834". Below the input field is a paragraph of instructional text: "You might need to include a '1' or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct." At the bottom right are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Phone Number to Dial
What is the phone number you will use to make this connection?

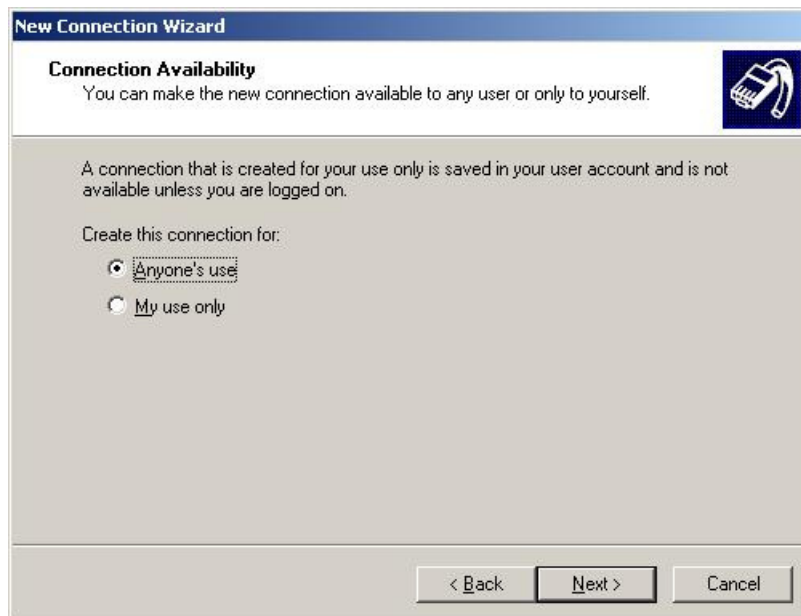

Type the phone number below.

Phone number:
237-4834

You might need to include a "1" or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct.

< Back Next > Cancel

You may choose Anyone's use or My use only, depending on your preferences. Click Next.

The image shows a second dialog box in the "New Connection Wizard" series. The subtitle is "Connection Availability". Below the subtitle is the text "You can make the new connection available to any user or only to yourself." To the right is the same telephone handset icon. Below this, it says "A connection that is created for your use only is saved in your user account and is not available unless you are logged on." followed by "Create this connection for:". There are two radio button options: "Anyone's use" (which is selected) and "My use only". At the bottom right are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Connection Availability
You can make the new connection available to any user or only to yourself.

A connection that is created for your use only is saved in your user account and is not available unless you are logged on.

Create this connection for:

☒ Anyone's use
☐ My use only

< Back Next > Cancel

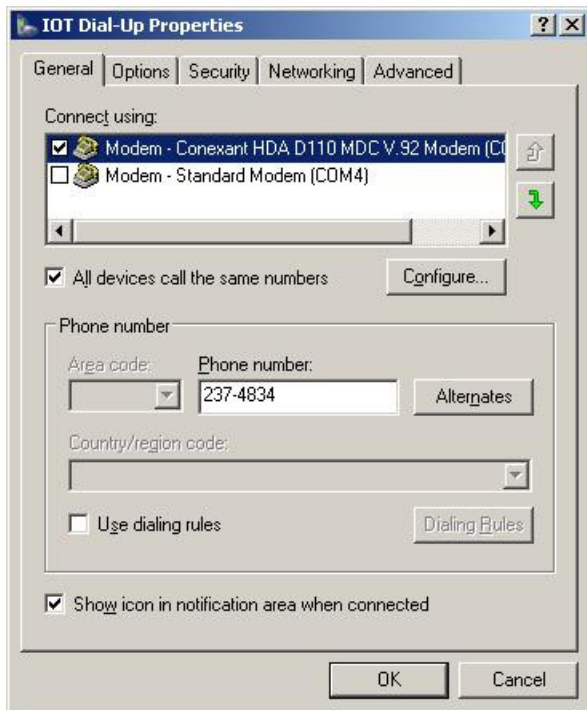

If you wish, you may click Add a shortcut to this connection to my desktop to place a shortcut on your desktop. Click Finish.

The connection will open with the window below. Click Properties.

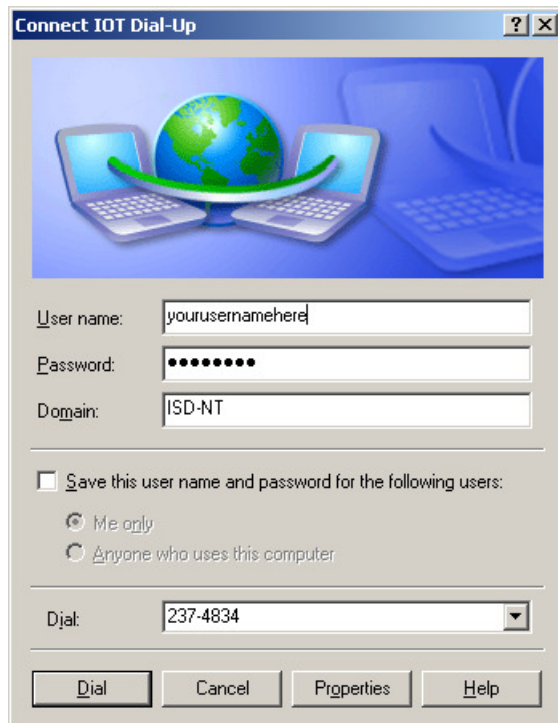

Click Options

On the options tab, click Include Windows logon domain. Click OK

Type your Windows username, password, and your domain into the appropriate spots and click Dial.

The image shows a Windows XP-style dialog box titled "Connect IOT Dial-Up". It features a blue header bar with a question mark and close button. Below the header is a graphic of two laptops connected by a green arc over a globe. The main area contains three text input fields: "User name:" with the placeholder "yourusernamehere", "Password:" with masked characters, and "Domain:" with the value "ISD-NT". Below these is a checkbox labeled "Save this user name and password for the following users:" with two radio button options: "Me only" (selected) and "Anyone who uses this computer". At the bottom is a "Dial:" dropdown menu showing "237-4834". The footer contains four buttons: "Dial", "Cancel", "Properties", and "Help".

Connect IOT Dial-Up

User name: yourusernamehere

Password:

Domain: ISD-NT

☐ Save this user name and password for the following users:

☒ Me only

☐ Anyone who uses this computer

Dial: 237-4834
